The Student Union: 50 Years

The Purdue Memorial Union, dedicated as a permanent memorial to those Purdue sons and daughters who served and died in World War I, celebrates its 50th anniversary. During its past years, the Union has undergone many changes in its facilities and services in order to continue its mission of service to the people of Purdue.

The various dining areas, recreational activities and reading rooms satisfy all interests. The most appealing gathering place for students is the Sweet Shop. Since its appearance in 1929, the Sweet Shop has become a very popular place for all at Purdue. Other dining areas include the nostalgic Union Station cafeteria, The Coffee Shop and The Sagamore Room featuring buffet service.

In the area of recreational activities, the Union offers bowling, billiards and an amusement-game room. There is also a browsing library and music

listening room. Several lounges include TV viewing and a place for faculty and students to relax between classes.

Other services offered by the Union include overnight facilities for guests, the student ride board and magazine-candy counters. The Union / Stewart Center complex occupies approximately 468,000 sq. ft.; 35,000 sq. ft. of this complex is office and workshop area occupied by student organizations. Meeting and conference rooms in the Union are capable of accommodating from 10 to 1500 people. Students' organizations are the most frequent users of these facilities, all groups being accommodated on an equal basis.

The Purdue Memorial Union, the second largest in the nation, remains one of the finest college unions maintaining modern service in response to the needs of the University.

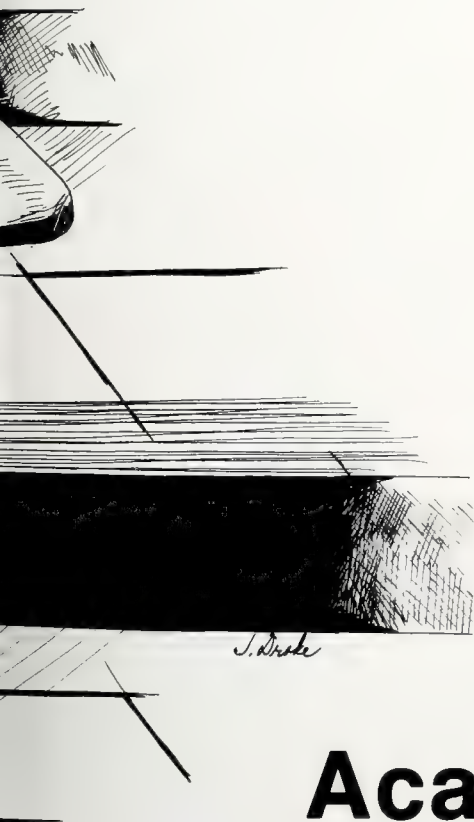

The mass of men
lead lives
of quiet desperation.
What is called
resignation
is confirmed
desperation.

Thoreau

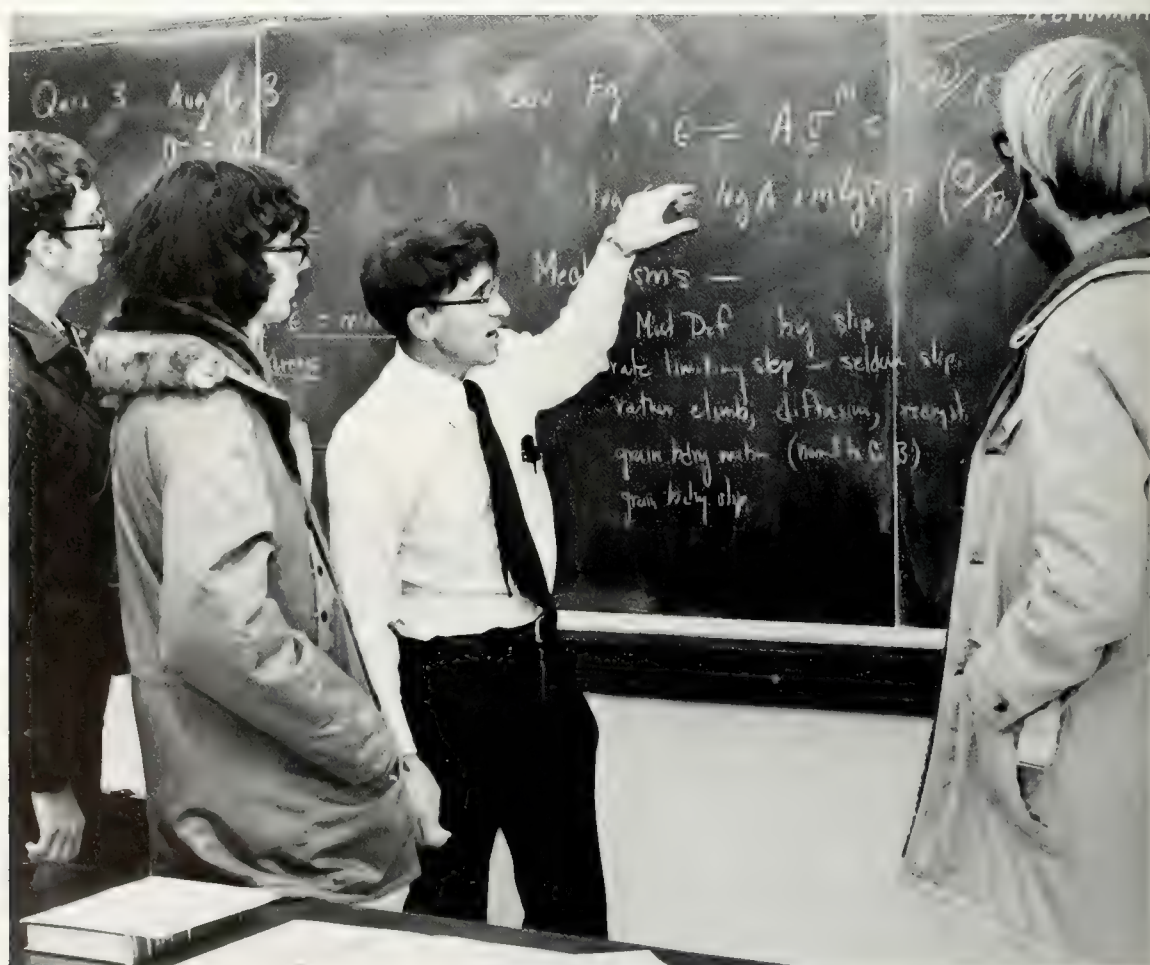

Academics

**No man's knowledge
here can go beyond
his experience.**

SCHOOL OF AGRICULTURE

The School of Agriculture offers instruction in agricultural science, agricultural business, and agricultural production. Courses are designed to train students for city, urban, and rural leadership, and for a variety of positions in educational, scientific, managerial, and commercial work in connection with institutions and industries closely allied with agriculture.

Dean Richard L. Kohls

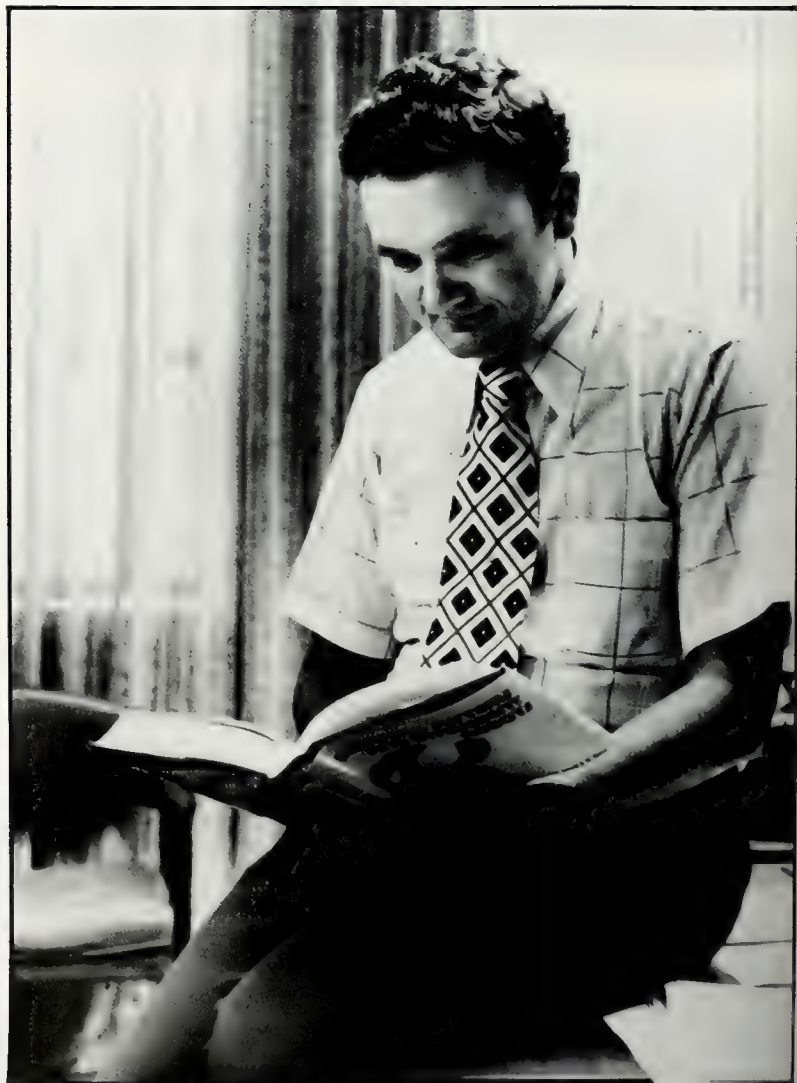

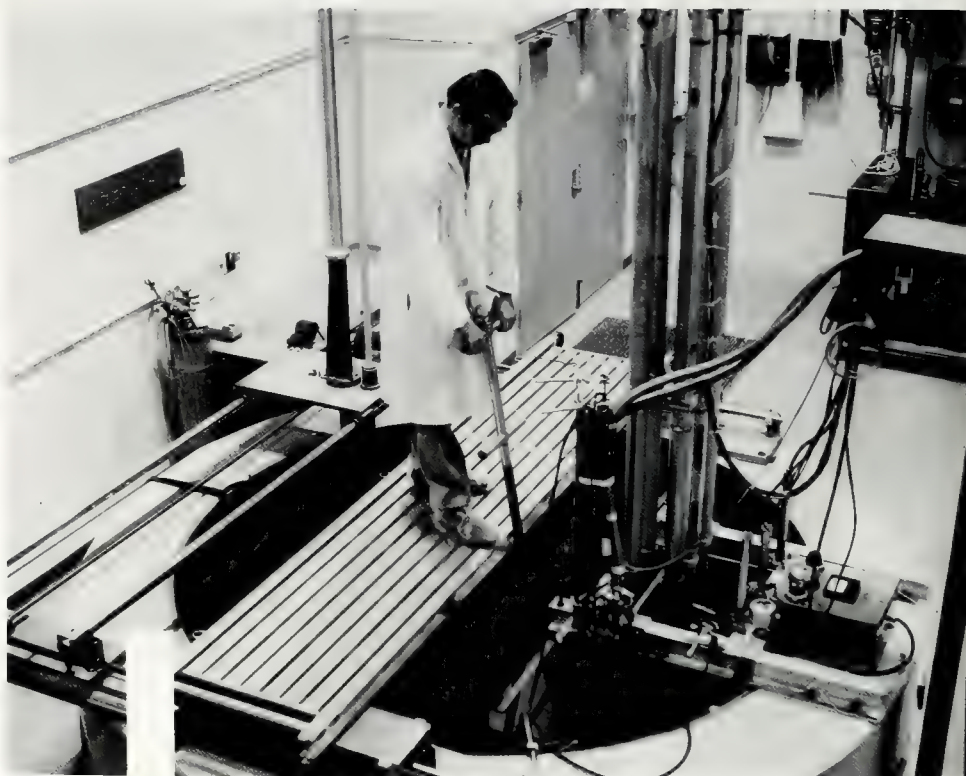

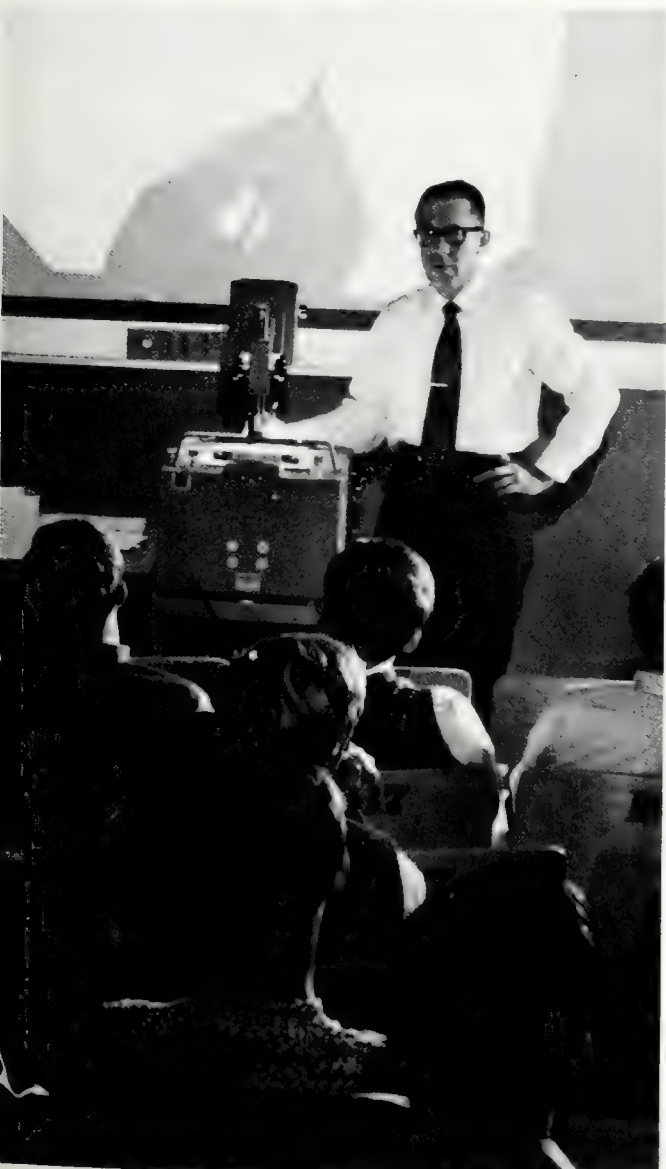

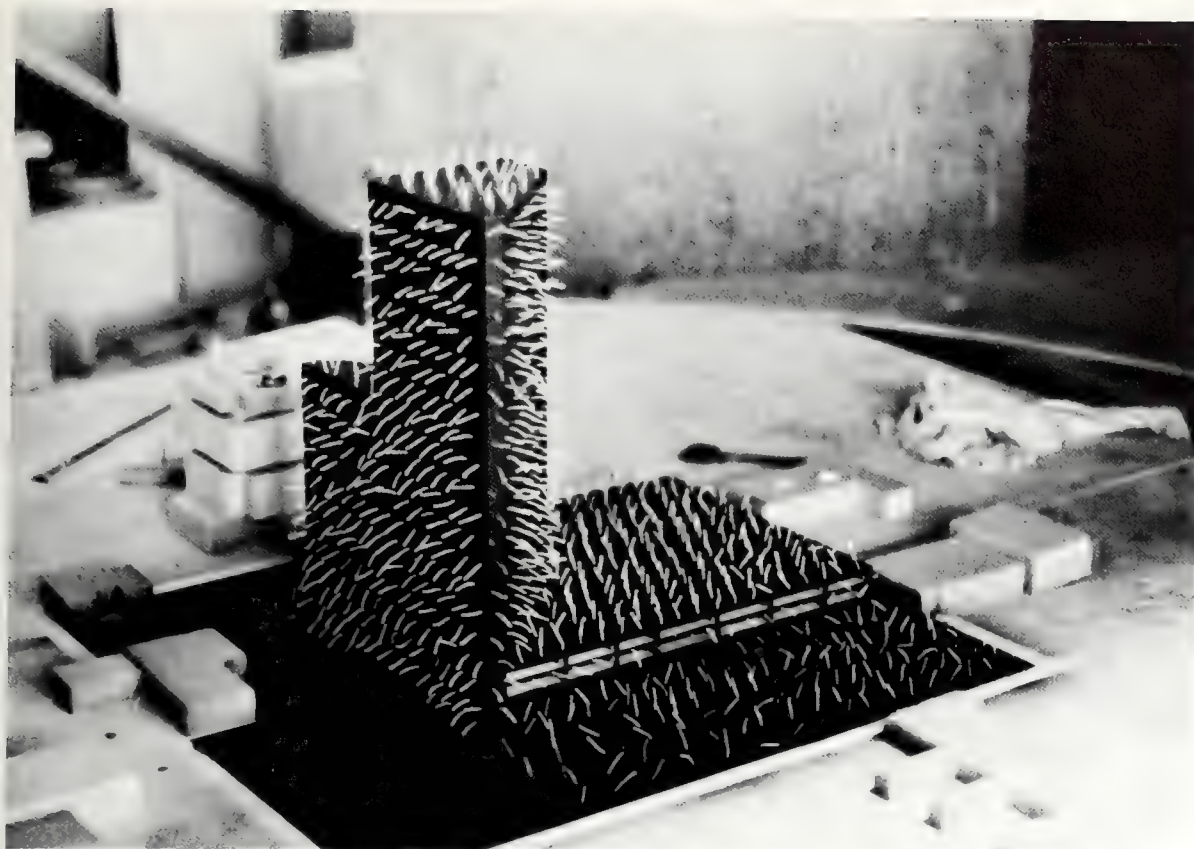

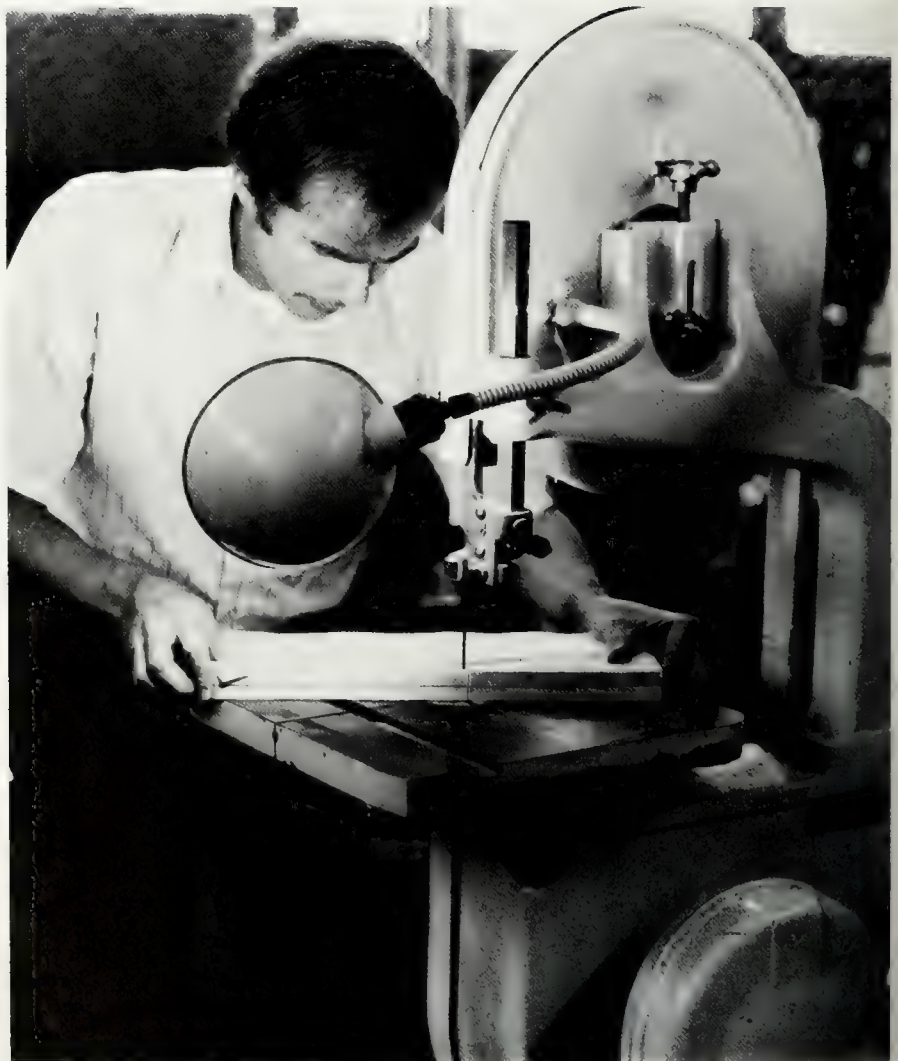

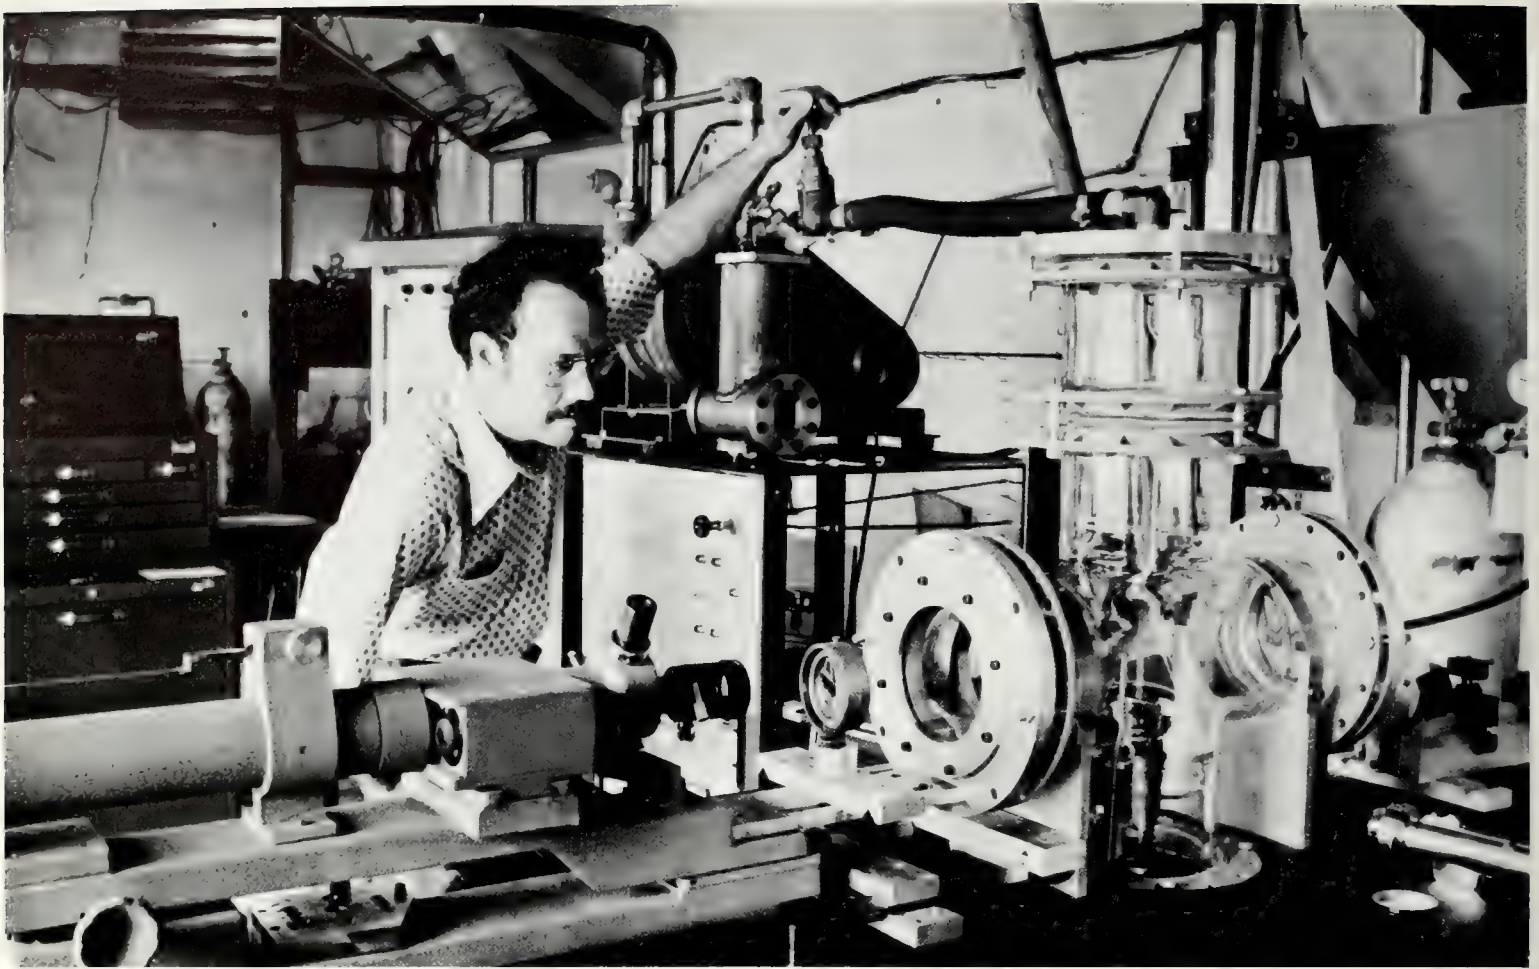

SCHOOLS OF ENGINEERING

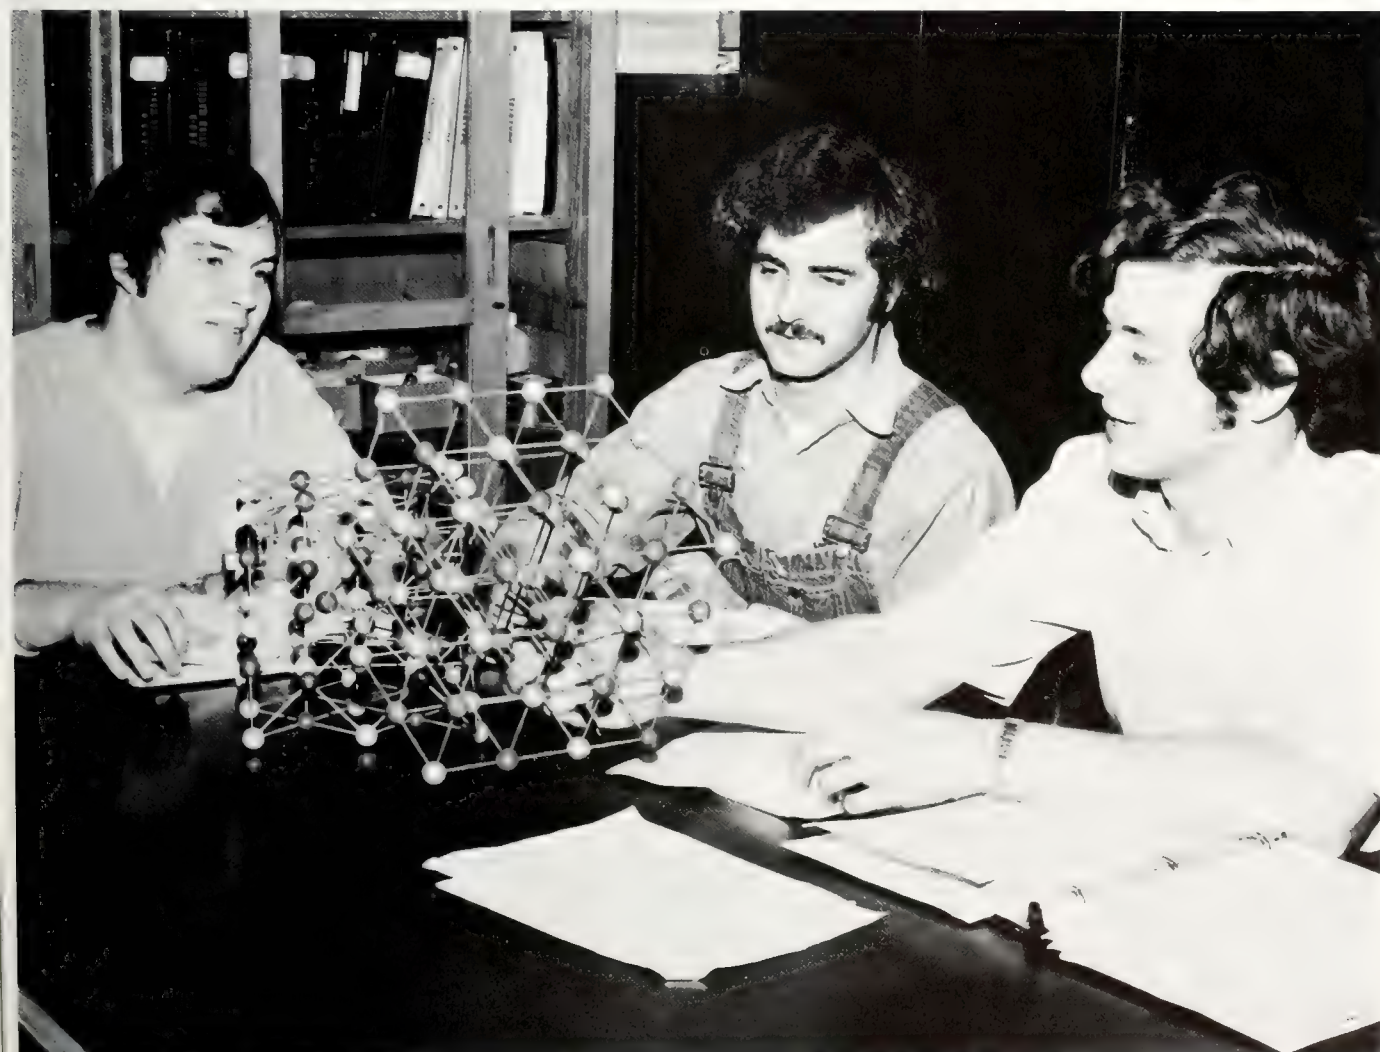

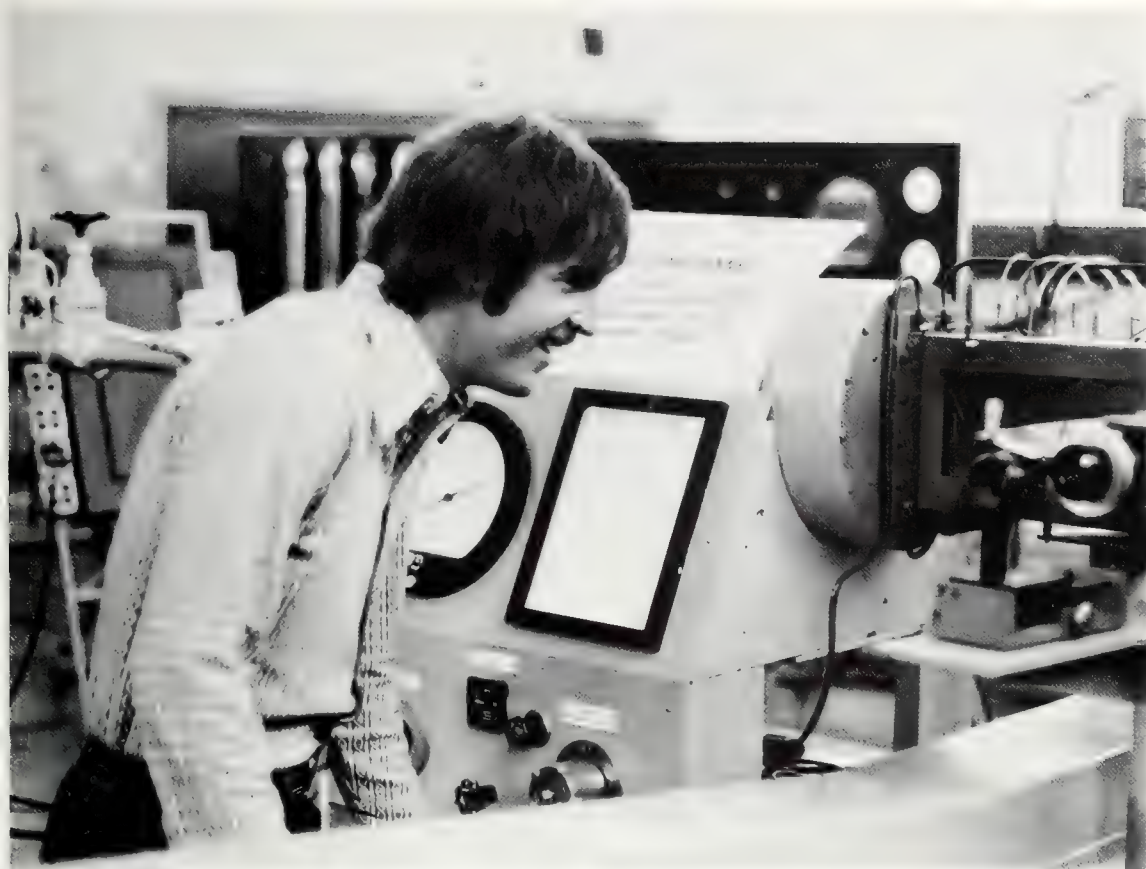

Engineering instruction has been offered at Purdue since the university first opened its doors to students in 1879. As a land grant college, Purdue was founded primarily to teach the agricultural and mechanical arts. Undergraduate instruction is offered in aeronautical engineering, agricultural engineering, chemical engineering, civil engineering, electrical engineering, engineering sciences, industrial engineering, mechanical engineering, materials science, and metallurgical engineering.

Dean John Hancock

SCHOOL OF HOME ECONOMICS

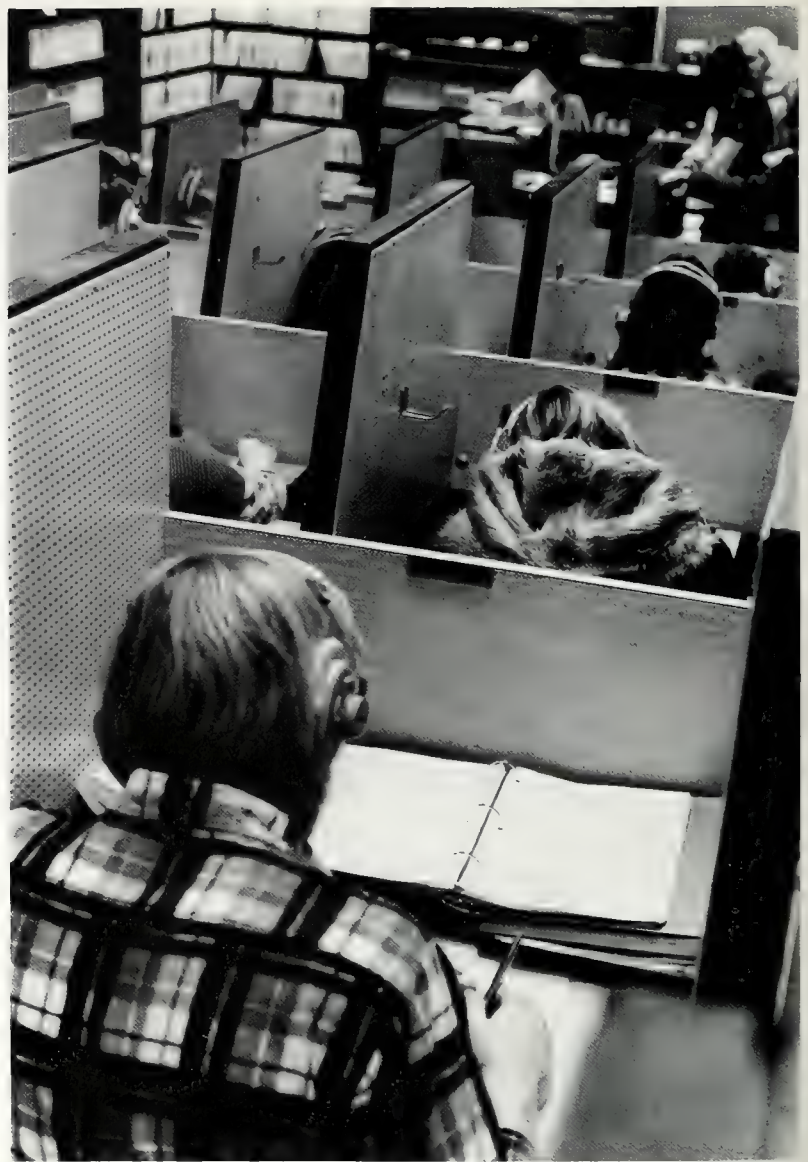

Dean Norma Compton

The primary purpose of the School of Home Economics is the intellectual development of its students and their preparation for professional service to individuals and families and those institutions which reinforce families. The school is organized in five departments: Clothing and Textiles; Equipment and Family Housing; Foods and Nutrition; Home Management and Family Economics; and Restaurant, Hotel, and Institutional Management. The degree of Bachelor of Science is awarded to the student completing the requirements as established for any one of the major plans of study.

SCHOOL OF HUMANITIES, SOCIAL SCIENCE, AND EDUCATION

Dean Robert L. Ringel

The School of Humanities, Social Science, and Education consists of 14 departments: Audiology and Speech Sciences, Child Development and Family Life, Communication, Creative Arts, Education, English, History, Modern Languages, Philosophy, Physical Education for Men, Physical Education for Women, Political Science, Psychological Sciences, and Sociology and Anthropology. The need for communication is of central importance today. Knowledge of the humanities with their emphasis upon man and his goals, of the social sciences with their analysis of man's attempt to understand and to control his society, and of education with its emphasis upon transmission of accumulated knowledge from one generation to the next plays a central role in facilitating communication among the parts of our society. Such knowledge is the goal sought by the curricula of the school.

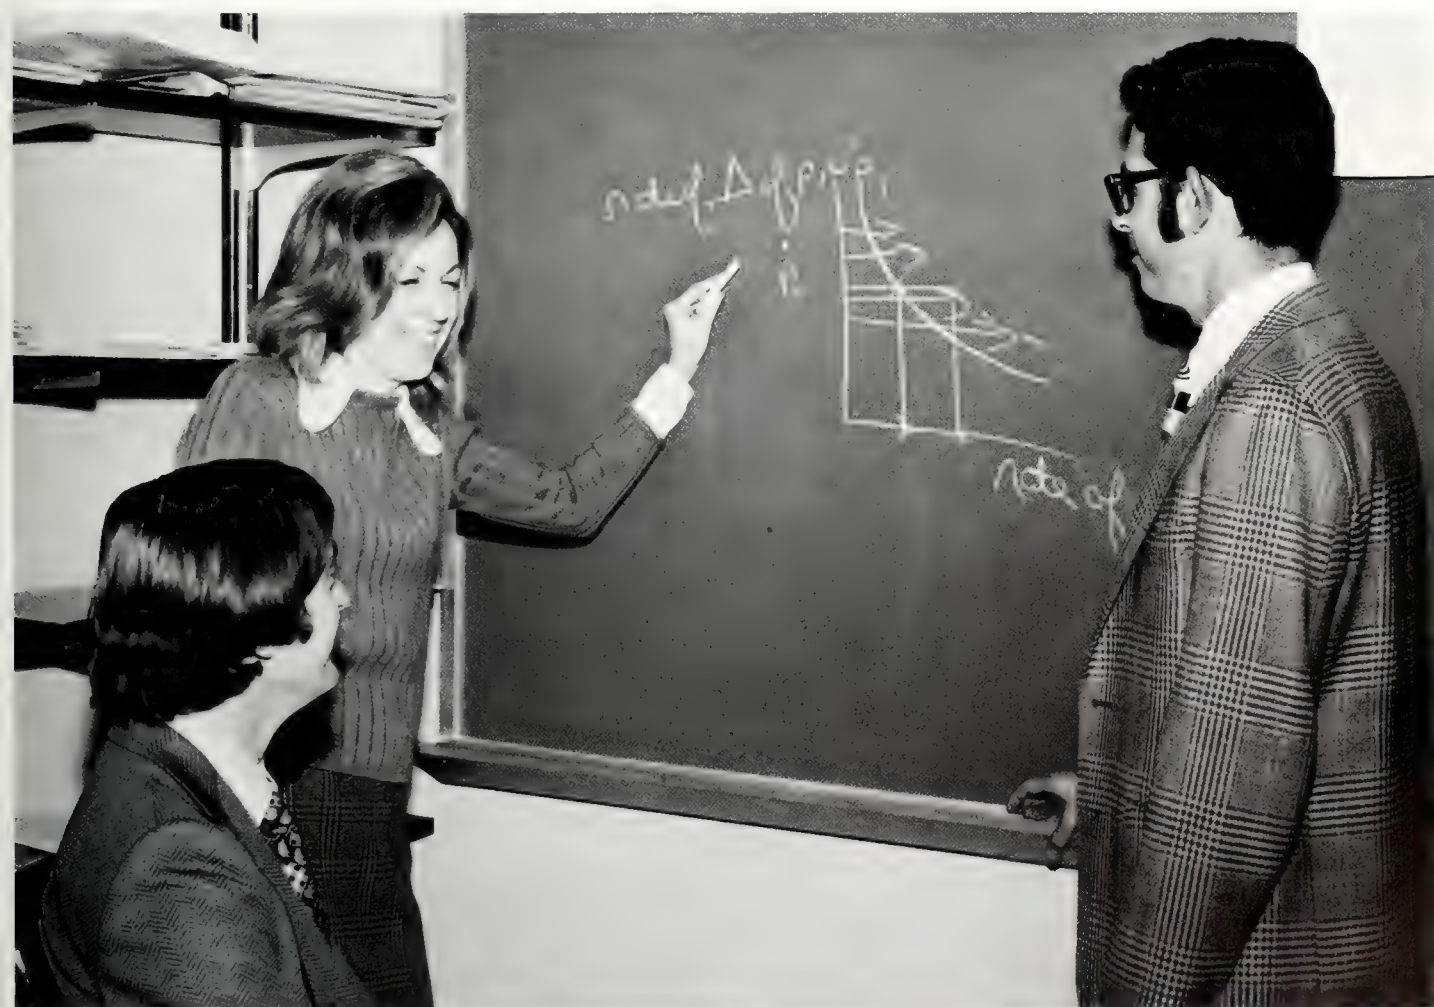

SCHOOL OF INDUSTRIAL MANAGEMENT

The School of Industrial Management, established in 1958, is organized around four major fields — economics, industrial management, transportation, and administrative sciences. The school tries to bridge these areas to the technological skills of engineering, statistics, and computer sciences.

Dean John S. Day

SCHOOL OF PHARMACY AND PHARMACAL SCIENCES

The School of Pharmacy was established in 1884 in response to a demand for a theoretical education and practical training in pharmacy and related subjects. Since then, more than 4,000 students have graduated from the school and are pursuing the professions of pharmacy, medicine, teaching, and science. The faculty has adopted the following statement of philosophy and objectives: "The principal objectives of pharmaceutical education is to prepare pharmacists to dispense prescribed medication and to advise the patient in an ethical manner on the proper use of all medications, both prescribed and patient-selected. In addition, pharmacists should be capable of acting as advisers to members of the medical and other health professions on all matters pertaining to drugs and their dosage forms.

Dean Varro E. Tyler

SCHOOL OF SCIENCE

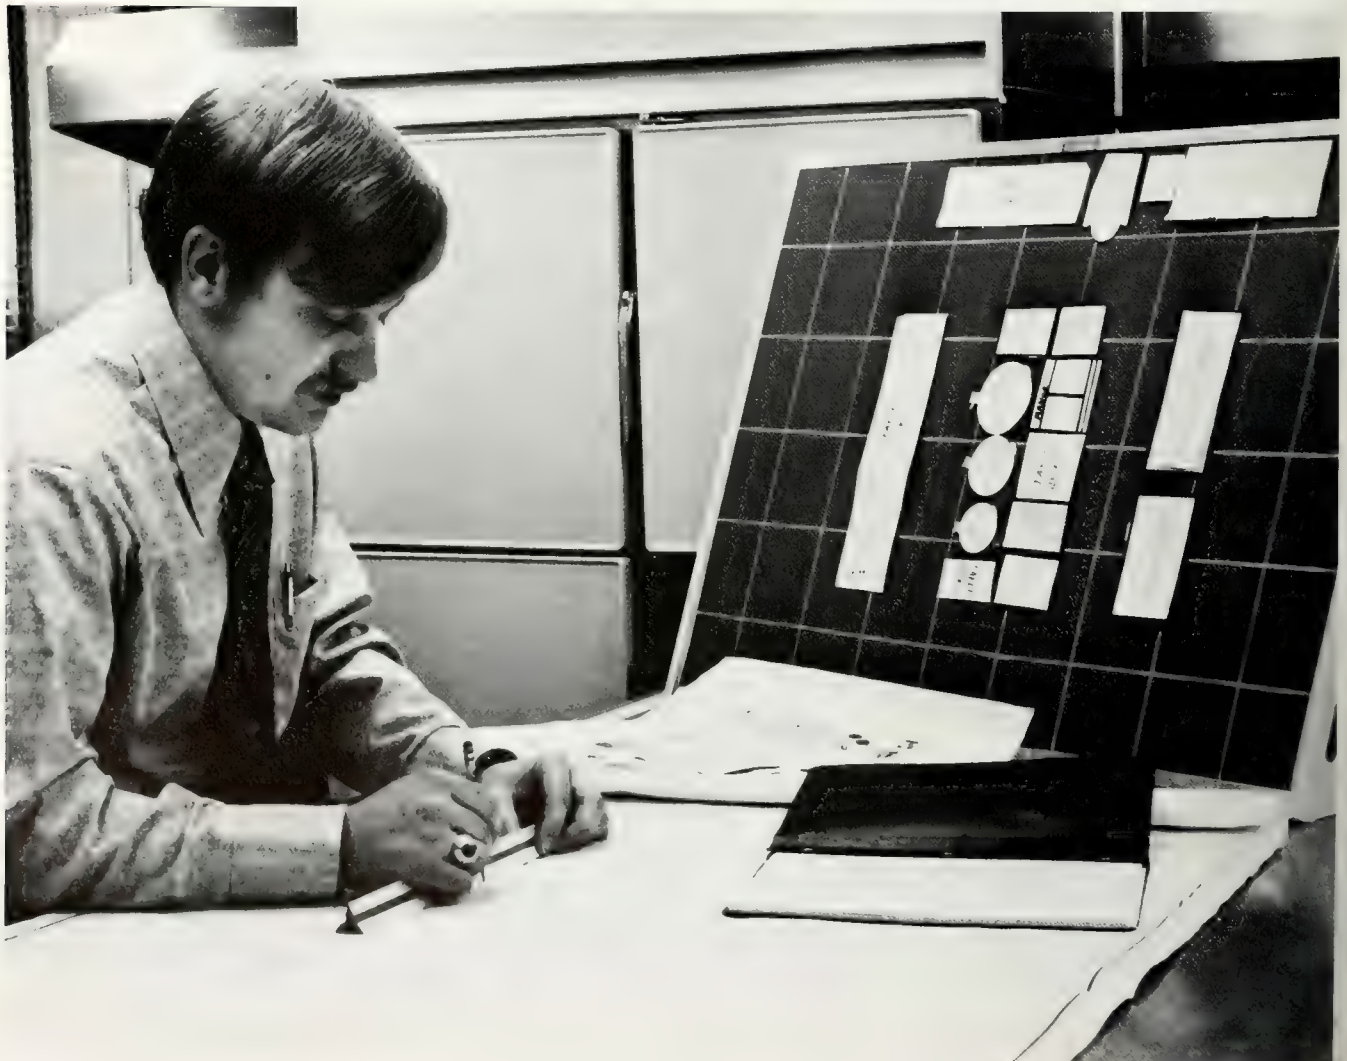

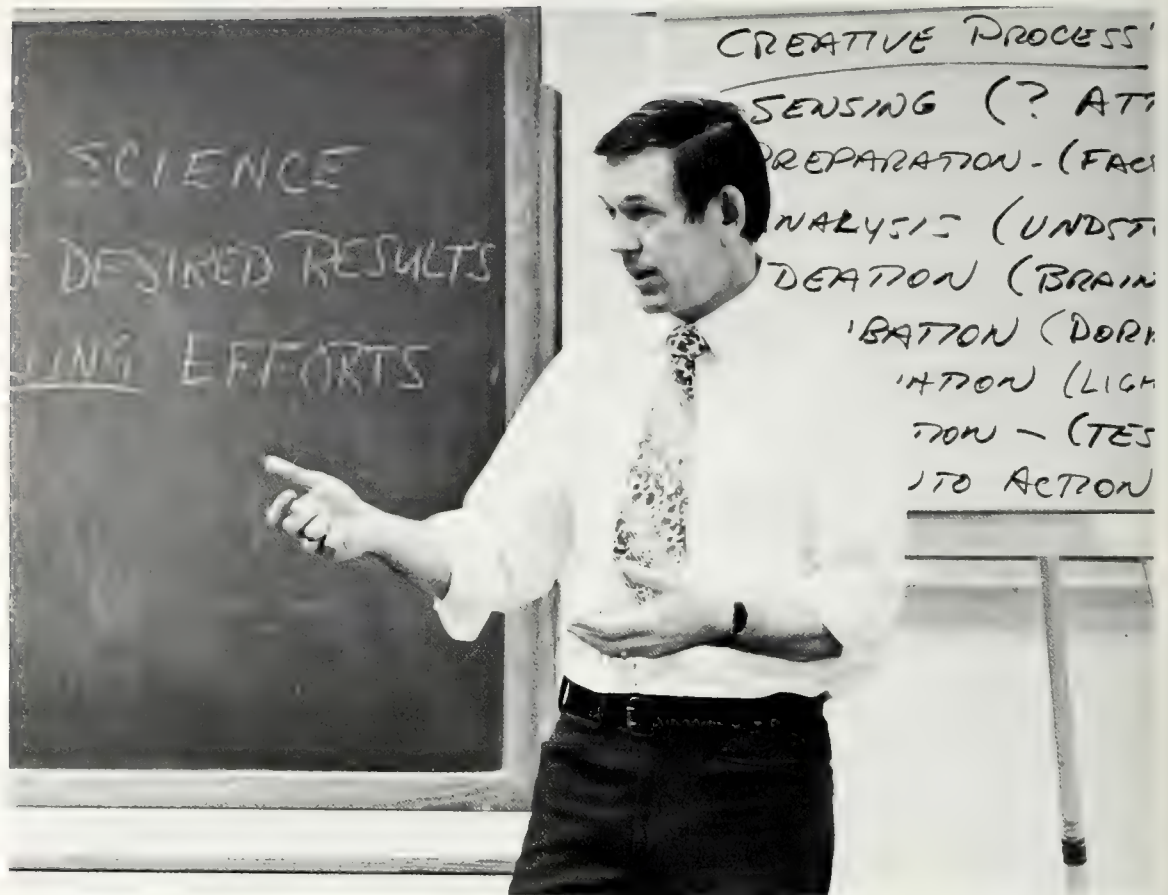

The School of Science offers a very broad program which prepares the prospective student for a variety of careers. At the present time there are more students enrolled in the various science courses at Purdue than any other American university. The accomplishments in revitalizing the science curricula has brought acclaim from all over the world.

Dean William Fuller

Dean George McNelly

SCHOOL OF TECHNOLOGY

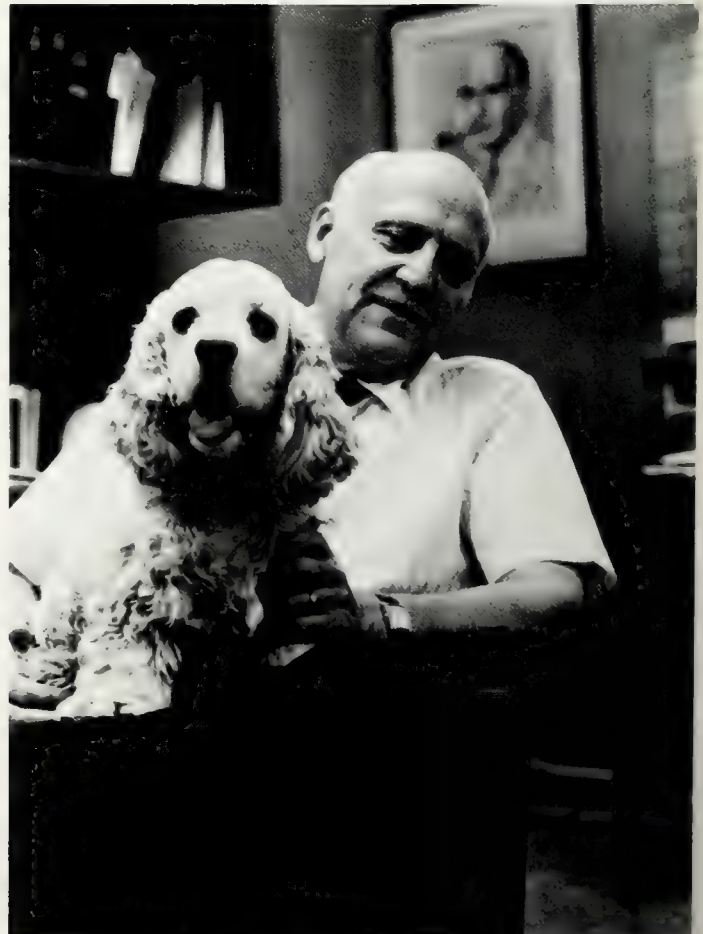

The Mission of the School of Technology is to provide appropriate career educational opportunities to students whose technological interests and aptitudes are essentially application oriented. The goal is to produce occupationally ready college graduates with salable skills to meet defined technical manpower needs, primarily for Indiana business, industry, and service agencies. In addition, the school provides professionally prepared teachers and leadership personnel for the field of industrial education. Academic programs in the School of Technology include engineering technology, nursing and mental health, aviation technology, supervision, and industrial education.

SCHOOL OF VETERINARY SCIENCE AND MEDICINE

The School of Veterinary Science, having its first graduating class in 1963, is one of the only nineteen schools in the nation which grants the Doctor of Veterinary Medicine. Recognized as one of the best, Purdue has sent graduates to work with the federal government as well as state governments, industries and universities.

FORESTRY CONSERVATION AND WILDLIFE CLUBS

Stop — and think about what nature really means.
Look — and observe the forests filled with life.
Listen — and realize that there's more to life than just living.
Robert Frost

Pray for this: to walk humbly on the earth, to greatly love a
thing, to love the earth, to be sparing of what it yields, and not
to have it poorer for my presence.

Malcolm Cowley

LANDSCAPE ARCHITECTS

CLUB OFFICERS Left to right: Jim Sheely, Vice-President; Pete Laughlin, Treasurer; Rob Harris, Secretary; Randy Eggenspiller, President; Larry Kennedy, Past President.

BLACK CULTURAL CENTER

The basic function of the Black Cultural Center is to contribute to the quality of life of Black people. The Center directly relates its programs to the Black life processes and problems and provides extensive cultural studies and services opportunities to University students, faculty, and community. The objective is to acquaint all peoples of the total community with the Black heritage. The Black Cultural Center strives to produce programs that will put in perspective the legitimacy and the worth of the experience of Black people.

The purpose of the Center lies in developing Black Trust, Awareness, Unity, and a Positive image through the idiom of Black Cultural.

P.U.S.H.

P.U.S.H. is the organization of Purdue University Speech and Hearing. It is a chapter member of the National Student Speech and Hearing Association. Any university student graduate or undergraduate interested in the study of normal and disordered communication behavior is eligible for membership in P.U.S.H. The purpose of the organization is to 1) encourage professional interest among university students in the field of speech and hearing therapy; 2) assist university departments and local organizations interested in speech, hearing, and language behavior disorders; and 3) provide service to the community in areas related to the functions of the speech clinician and audiologist.

PURDUE SCUBA CLUB

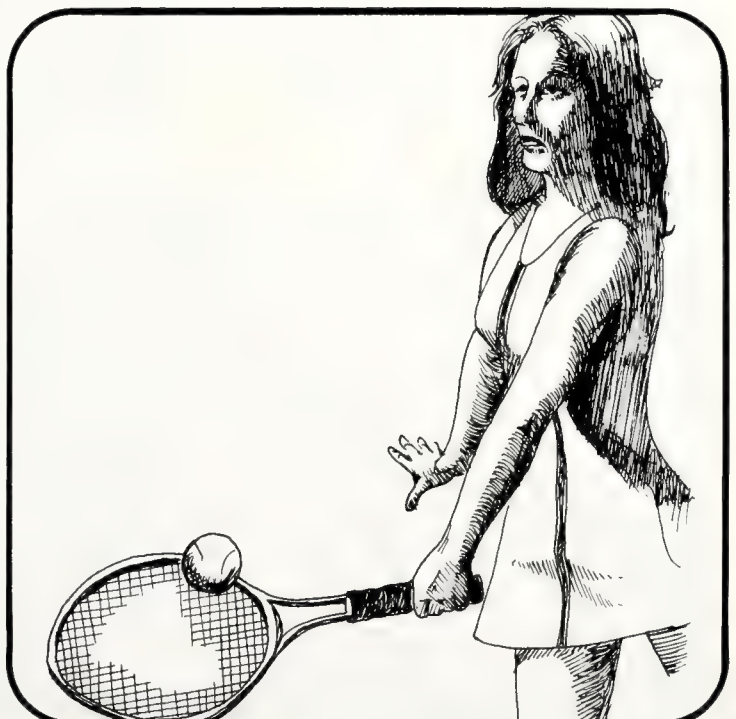

The P.S.C. provides students with opportunities to become involved in one of America's fastest growing sports. In addition to sponsoring both basic and advanced lessons, the club organizes dives throughout the Midwest and as far away as the Atlantic and Gulf coasts. Left: Twilight envelopes a diver 140 feet deep in the Blue Hole of Lighthouse Reef, Belize. Below: Storm waves wrecked the German freighter "Alpa" in 1917 on Glover's Reef, Belize. Snorkelers explore the ship's triple expansion steam engine. Bottom: Rangers patrol and protect the underwater environment in John C. Pennekamp State Park, Florida, allowing this stand of Elkhorn Coral to grow undisturbed by man.

Residences

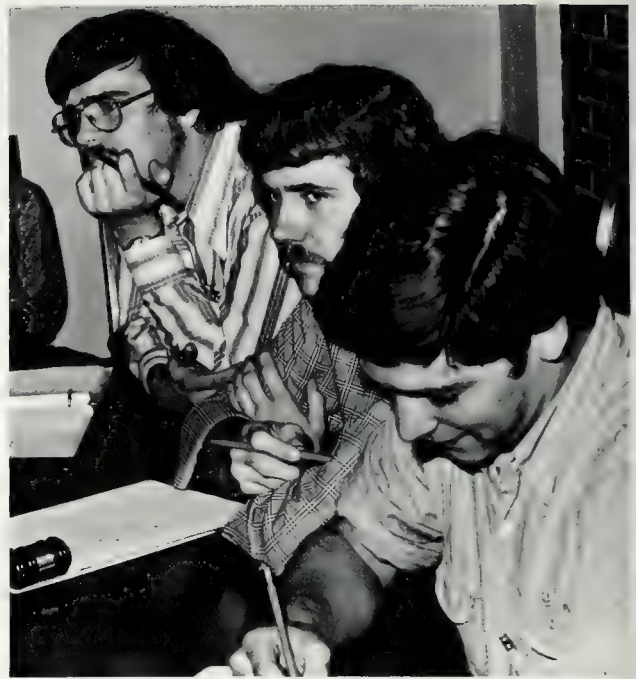

RSITY

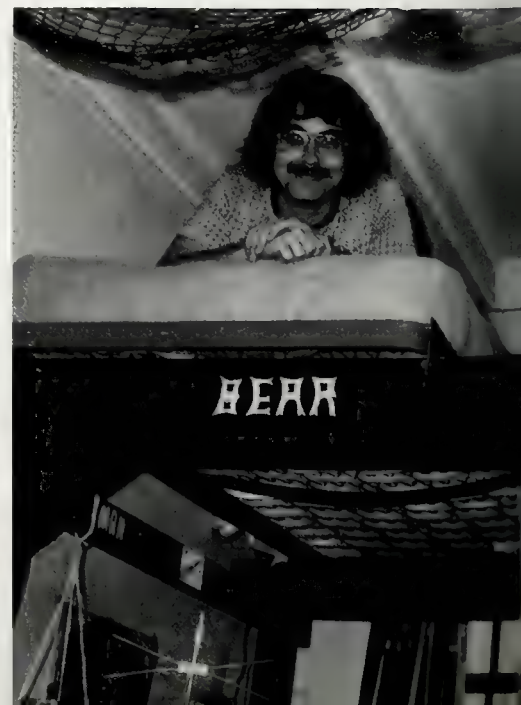

As the largest residence unit on campus, the Club's 1500 residents have gained respect in the dormitory system by turning their cramped living quarters into an asset. By the efficient use of bed lofts and very functional furniture, clubbers have found ways of using the Quad's often overlooked benefits to their fullest. A new game room rivaling the Union's, a new and improved darkroom complete with studios, a newly constructed council chamber, a workshop for the use of the residents, a keypunch room, and a biology learning center are just samples of the Club's space utilization program.

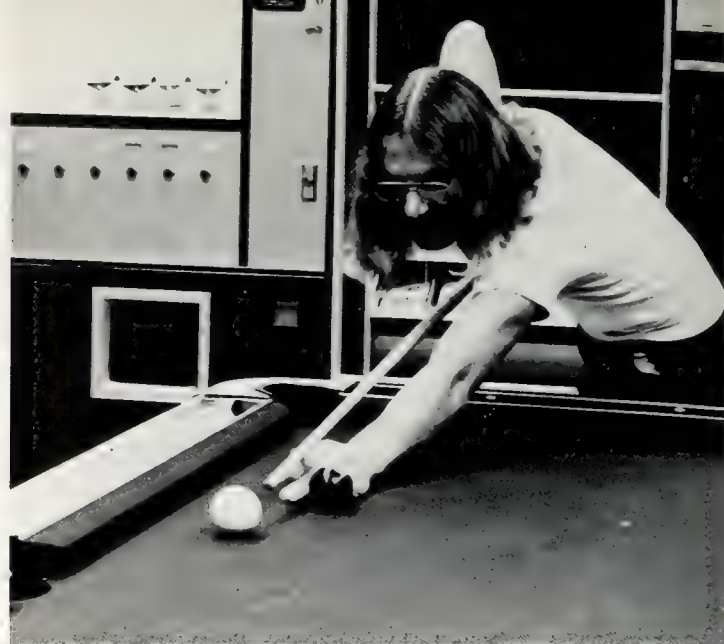

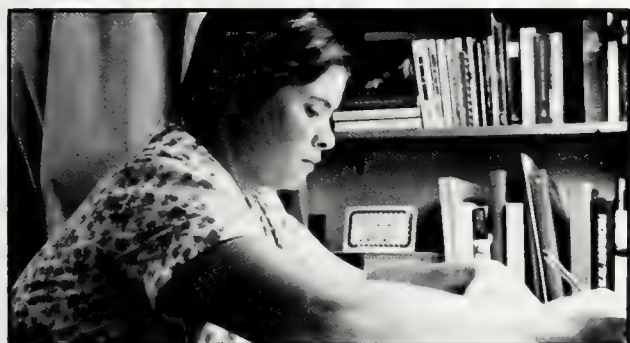

Recognizing the need for periodic diversions from studying to complete the living environment, the Club offers various programs and activities. Cary sponsors intramural athletic leagues, a very popular Winter Whispers dance, successful coffee houses, casino parties, popular movies, a car show, the Grand Prix trike race, and of course the famous Winter Olympics! In appreciation to the community which has generously supported Cary, the Club reciprocates by taking great pride and care in organizing activities for children in the area, as well as its efforts in visiting area hospitals at Halloween, Christmas and Easter. Cary has held the APO blood cup for several semesters and also has been supporting children in Southeast Asia for years.

With its proximity to the athletic arenas and to campus in conjunction with its program and facilities, Cary is fast becoming the place to live at Purdue.

MC CUTCHEON

A community in itself, far in distance yet near in spirit, to all of Purdue. A wide cross-section of people and personalities provide sufficient energy, initiative, and originality to make any dorm function a success.

Activities are many and varied, ranging from a greaser decked-out fifties party to a formal Scotia Fantasia. Here residents join together to help support Homecoming or just enjoy a few "quiet" moments in the Pipers Inn. Wide ranges of interest are reflected in its people as they get into the spirit of Holloween, join together to finish a homecoming display or relax to a soft rock concert.

Hall pride is not a small thought, but a full time profession for many students, who would live no where else on campus.

McCutcheon Hall — something for everyone.

Scotia Fantasia is McCutcheon's pride and the social event of the year for both the dorm and campus. Dinner and dancing in a Scottish atmosphere makes a delightful evening, while the Gordon Pipers lend an air of authenticity.

To accomplish great things,
we must not only act,
but also dream,
not only plan,
but also believe.

Anatole France

You give but little
when you give
of your possessions . . .

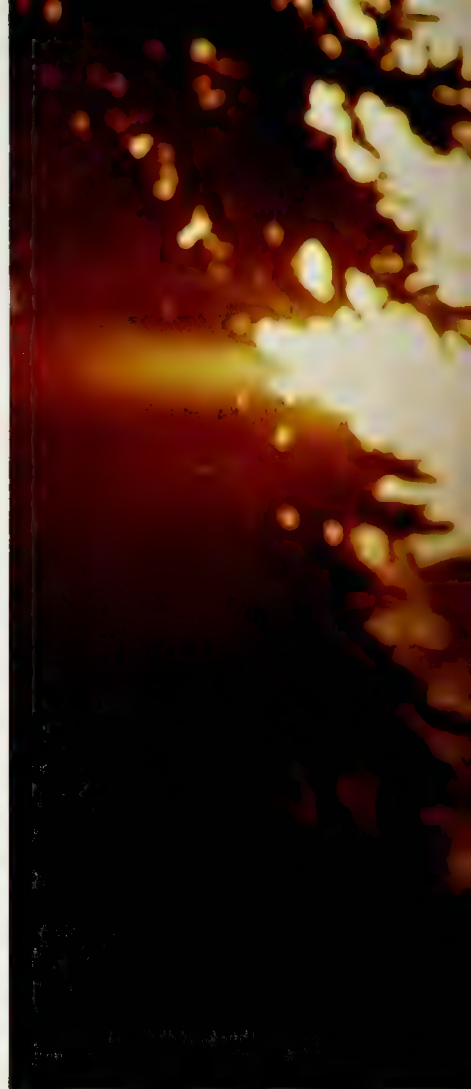

. . . It is when you
give of yourself
that you truly give.
Kahlil Gibran

To be able to lead others, a man must
be willing to go forward alone.
